DETAILED ACTION

This Office action is responsive to communication received 04/23/2004 – application papers filed and IDS; 11/24/2004 – Response to Notice to File Missing Parts and Drawings.

This application is a CON of 10/065,871, filed 11/26/2002, now U.S. Patent 6,758,763, which is a CIP of 09/906,889, filed 07/16/2001, now U.S. Patent 6,491,592, which is a CIP of 09/431,982, filed 11/01/1999, now U.S. Patent 6,354,962.

Claims 1-64 are pending.

Election/Restrictions

This application contains claims directed to patentably distinct species of the claimed invention, as outlined herein below. In this case, the claims have been grouped in accordance with the species to which they are restricted.

Species I: Claims 1-30 and 41-61, detailing a face component that includes a striking plate portion and a return portion, and an aft body, with additional specifics directed towards any one of the coefficient of restitution, the moment of inertia, or the aspect ratio;

Species II: Claims 31-40 and 62-64, detailing a face component that includes a striking plate portion and a return portion, an aft body and an interior tubing for receiving a shaft, the interior tubing engaging an upper and lower portion of the return portion.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

Art Unit: 3711

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sebastiano Passaniti whose telephone number is 571-272-4413. The examiner can normally be reached on Monday through Friday (6:30AM - 3:00PM).
